AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Previously Presented) A storage wrap material according to Claim 81, wherein the adhesion peel force after activation by a user is sufficient to form a continuous seal against a target surface.

Claims 2-8 (Canceled)

9. (Original) The storage wrap material of Claim 1, wherein said active side exhibits an adhesion peel force of at least about 1 ounce per inch width after activation by a user.

10. (Original) The storage wrap material of Claim 1, wherein said active side may be selectively activated in discrete regions by a user.

11. (Original) The storage wrap material of Claim 1, wherein said adhesion peel force after activation is sufficient to form a barrier seal against a target surface, said seal exhibiting barrier properties at least as great as those of said sheet of material.

12. (Original) The storage wrap material of Claim 1, wherein both said first side and said second side comprise active sides of said material.

Claim 13 (Canceled)

14. (Original) The storage wrap material of Claim 1, wherein said active side includes a pressure sensitive adhesive.

15. (Original) The storage wrap material of Claim 1, wherein said sheet of material comprises a polymeric film material.

16. (Original) The storage wrap material of Claim 15, wherein said polymeric film material is selected from the group consisting of: a substantially translucent polymeric film material and a substantially transparent polymeric film material.

3

17. (Original) The storage wrap material of Claim 1, wherein said active side comprises a plurality of three dimensional non-adherent protrusions extending outwardly from said sheet of material and a pressure sensitive adhesive surrounding said non-adherent protrusions, said adhesive having a thickness less than the height of said non-adherent protrusions before activation.

18. (Original) The storage wrap material of Claim 1, wherein said sheet of material is clingless and exhibits no adhesion peel force prior to activation by a user.

Claims 19-40 (Canceled)

41. (Currently amended) A storage wrap material comprising: a sheet of non-porous material having a first side and a second side, said first side comprising an active side exhibiting an adhesion peel force after activation by a user that is greater than an adhesion peel force exhibited prior to activation by a user, said active side further comprising an adhesive disposed continuously thereon, wherein said sheet of material is linerless, such that activation of said active side requires no removal of components of said sheet of material, wherein said active side is activatable by a tensile force, said sheet of material being sufficiently flexible to conform readily to a desired surface and having sufficiently small resiliency that it does not exert undue restorative forces that would tend to cause said sheet of material to break contact with such a desired surface.

Claims 42-46 (Canceled)

47. (Currently amended) The storage wrap of Claim 41 46, wherein said tensile force is required to be at least about 0.80 pounds per inch of strip width to activate said active side.

48. (Currently amended) The storage wrap of Claim 41 46, wherein said tensile force is exerted in a direction substantially parallel to said sheet of material.

49. (Original) The storage wrap material of Claim 41, wherein said active side exhibits an adhesion peel force of at least about 1 ounce per inch width after activation by a user.

50. (Original) The storage wrap material of Claim 41, wherein said active side may be selectively activated in discrete regions by a user.

4

51. (Original) The storage wrap material of Claim 41, wherein said adhesion peel force after activation is sufficient to form a barrier seal against a target surface, said seal exhibiting barrier properties at least as great as those of said sheet of material.

52. (Original) The storage wrap material of Claim 41, wherein both said first side and said second side comprise active sides of said material.

Claim 53 (Canceled)

54. (Original) The storage wrap material of Claim 41, wherein said active side includes a pressure sensitive adhesive.

55. (Original) The storage wrap of Claim 41, wherein said sheet of material comprises a polymeric film material.

56. (Original) The storage wrap material of Claim 55, wherein said polymeric film material is selected from the group consisting of: a substantially translucent polymeric film material and a substantially transparent polymeric film material.

57. (Original) The storage wrap material of Claim 41, wherein said active side comprises a plurality of three dimensional non-adherent protrusions extending outwardly from said sheet of material and a pressure sensitive adhesive surrounding said non-adherent protrusions, said adhesive having a thickness less than the height of said non-adherent protrusions before activation.

58. (Original) The storage wrap material of Claim 41, wherein said sheet of material is clingless and exhibits no adhesion peel force prior to activation by a user.

Claims 59-65 (Canceled)

66. (Original) A storage wrap material of Claim 41, wherein said active side when activated forms a bond with a target surface, said bond being selected from one or more groups consisting of: a discontinuous bond, a permanent bond, a refastenable bond, a resealable bond and a releasable bond.

Claims 67-80 (Canceled)

5

81. (Previously Presented) A storage wrap material according to Claim 41 wherein the adhesion peel force after activation by a user is sufficient to form a seal against a target surface.

Claims 82-94 (Canceled)

95. (Currently amended) A storage wrap material comprising a sheet of non-porous material having a first side and a second side, substantially all of said first side comprising an active side, said active side comprising an adhesive disposed continuously thereon, said active side exhibiting an adhesion peel force after activation by a user that is greater than an adhesion peel force exhibited prior to said activation by a user, wherein said active side is activatable by a tensile force, wherein said sheet of material is linerless, such that activation of said active side requires no removal of components of said sheet of material, said sheet being sufficiently flexible to conform readily to a desired surface and having sufficiently small resiliency that it does not exert undue restorative forces that would tend to cause said sheet of material to break contact with such a desired surface.

Claim 96 (Canceled)

97. (Original) The storage wrap material of Claim 95, wherein said active side may be selectively activated in discrete regions by a user.

98. (Original) The storage wrap material of Claim 95, wherein said active side may be activated by compression against a target surface.

99. (Original) The storage wrap material of Claim 95, wherein said adhesion peel force after activation is sufficient to form a barrier seal against a target surface, said seal exhibiting barrier properties at least as great as those of said sheet of material.

100. (Original) The storage wrap material of Claim 95, wherein both said first side and said second side comprise active sides of said material.

101. (Original) A storage wrap material according to Claim 95, wherein said active side when activated forms a bond with a target surface, said bond being selected from one or more of the group consisting of: a discontinuous bond, a permanent bond, a refastenable bond, a resealable bond and a releasable bond.

6

102. (Original) A storage wrap material according to Claim 95, wherein the adhesion peel force after activation by a user is sufficient to form a seal against a target surface.

103. (Original) A storage wrap material according to Claim 102, wherein the adhesion peel force after activation by a user is sufficient to form a continuous seal against a target surface.

Claim 104 (Canceled)

105. (Original) The storage wrap material of Claim 103, wherein said active may be selectively activated in discrete regions by a user.

106. (Original) The storage wrap material of Claim 103, wherein said active side may be activated by compression against a target surface.

107. (Original) The storage wrap material of Claim 103, wherein said adhesion peel force after activation is sufficient to form a barrier seal against a target surface, said seal exhibiting barrier properties at least as great as those of said sheet of material.

108. (Original) The storage wrap material of Claim 103, wherein both said first side and said second side comprise active sides of said material.
